

ISDN's subsidiary AR Robotics brings in Soradynamics and Trinity as strategic partners to drive robotics and AI business

- AR Robotics (a wholly owned subsidiary of ISDN prior to the divestment) holds a 30% equity stake in the partnership with Soradynamics and Trinity, bringing in seed capital of S\$1.0 million, manufacturing know-how, and its Asia sales network.
- As global supply chain realignment accelerates the shift away from Chinese-made robotics, AR Robotics is well-positioned as a performance-proven alternative to serve markets in Asia Pacific, Europe, and the United States.
- The new partnership marks a new milestone in ISDN's strategy of building and commercialising advanced technology ventures, strengthening its foothold as a leading industrial automation platform across Asia.

Singapore, 21 April 2026 – ISDN Holdings Limited (“**ISDN**”, the “**Company**”, and together with its subsidiaries, the “**Group**”), a leading industrial automation and renewable energy solutions provider in Asia, announces that its wholly-owned subsidiary, AR Robotics and Automation Pte. Ltd. (“**AR Robotics**”), has divested 486,500 ordinary shares in AR Robotics to Trinity One LT Limited (“**Trinity**”) and **Soradynamics, Co., LTD.** (“**Soradynamics**”). The divestment brings together Trinity's financial backing and market development expertise, as well as Soradynamics' proprietary technology, to accelerate AR Robotics' commercial development in advanced robotics and AI solutions for international markets. Following the divestment, ISDN retains a 30% equity stake in AR Robotics, with Trinity holding 40% and Soradynamics holding 30%.

In addition, ISDN will contribute S\$1.0 million in seed capital to establish the operations, together with its manufacturing know-how and Asia sales network built over nearly four decades of industrial automation experience. Soradynamics brings proprietary drone technology and multi-camera video fusion capabilities, independently tested for stability and endurance on par with leading global players. Trinity, a British Virgin Islands (“**BVI**”) registered company, provides financial backing as AR Robotics' largest shareholder. Trinity was instrumental in bringing Soradynamics to Singapore, with this partnership marking the first time all three parties have come together to drive a commercial entity.

AR Robotics' core business model is built on a robotics and AI platform that uses the drone as its hardware foundation. Using this platform, AR Robotics is developing modular end effectors for multiple high-growth industrial applications, including firefighting, inspection, delivery, and surveillance.

Notably, the partnership enters with early commercial progress, supported by an initial contract pipeline of approximately USD10 million, and its multi-camera video fusion technology is currently in trials with notable agencies in Singapore.

AR Robotics targets markets in Asia Pacific first, with plans to expand into Europe and the United States. With global supply chain realignment driving demand for non-Chinese

alternatives in advanced drone and robotics solutions, Soradynamics' independently tested technology gives AR Robotics a performance-proven option for buyers seeking alternatives to Chinese-made systems.

According to Technavio, the global commercial drone market is forecast to grow by USD22.33 billion between 2026 and 2030, at a compound annual growth rate of 12.6%, driven by rising enterprise adoption across infrastructure inspection, public safety, and industrial applications. Growth is accelerating as enterprises shift from niche deployments toward large-scale, automated operations, precisely the verticals AR Robotics' modular platform is built to serve.¹ With inspection and maintenance alone projected to account for more than 25% of total commercial drone revenue by 2030², AR Robotics enters a market where demand for specialised, application-ready drone platforms is expanding across every geography it targets.

On the strategic partnership, Mr. Teo Cher Koon, Managing Director and President of ISDN Holdings Limited, commented:

“AR Robotics reflects how ISDN builds value. We identify high-potential technology, bring our manufacturing depth and Asia network to bear, and partner with the right people to take it global.

The geopolitical shift away from Chinese-made robotics is creating a real and immediate opening for what we are building here, and we enter with USD10 million contracts in the pipeline to show the market is ready. Just as NovaPeak Pte. Ltd. has grown from an idea into a globally partnered AI inspection platform, we expect AR Robotics to follow the same path.”

Mr. Hirotaka Kuroki, Director of Soradynamics, Co., Ltd, added:

“We strongly believe that our partnership with Trinity and ISDN will further strengthen our position in the market in the offering of Japanese drone and robotics technologies to the region.”

Mr. Darren Loi, Partner of Trinity One LT Limited, said:

“With the partnership, AR Robotics will possess Deep Tech Manufacturing capabilities in the ecosystem of Robotics and AI. We believe Singapore will continue to attract more of such partnerships and we welcome collaborations to leverage on our core competencies in Deep Tech Manufacturing for the robotics, drone and AI industry.”

Compliance with Chapter 10 of the Singapore Exchange Securities Trading Limited (“SGX-ST”) Listing Manual

This press release is intended for informational purposes and does not constitute a formal disclosure under the SGX-ST Listing Manual. The relative figures for the divestment of AR Robotics have been computed based on the prescribed bases of comparison under Rule 1006. As the absolute relative figures under Rule 1006 of the SGX-ST Listing Manual do not exceed 5%, the transaction constitutes a non-discloseable transaction under Chapter 10 of the SGX-ST. Consequently, no announcement is required to be made under Rule 1010 of the SGX-ST Listing Manual.

About ISDN Holdings

ISDN is a leading provider of industrial automation solutions throughout Asia, serving more than 10,000 customers through 75 sales offices spanning key Asian growth markets. Founded in 1986, ISDN has a 30-year track record supporting advanced industries including semiconductors, aerospace, medical devices, clean energy, and intelligent manufacturing.

ISDN has been listed on the SGX Main Board since 2005 and the Hong Kong Stock Exchange Main Board since 2017.

About Soradynamics

Soradynamics, Co., LTD takes the responsibility as Japan’s rapidly growing drone manufacturer seriously. The Company designs, assembles, and supports products in Japan, which enables Soradynamics to provide a high level of supply chain security and serve as a trusted partner to government agency and large corporation clients, and it reflects the best of Japanese innovation, trustworthiness, and craftsmanship.

About Trinity

Trinity One LT Limited, a BVI registered entity bridges innovation with the right partners to create adoption of disruptive technologies and accelerating growth via partnerships across the Asia Pacific Region.
